

On-The-Go Solution Powering Collaboration & Efficiency in Operations, Finance and Customer Service

Based on a single platform, Blume CarrierGo™ is a solution for drayage motor carriers worldwide and their drivers to effectively manage end-to-end business operations. The solution enables operations such as: accessing new business, managing orders, accept/reject work orders, driver management, reporting events, and digitally managing rates and invoicing. It is a transportation execution system that enables communication between motor carriers and their logistics service provider, ocean carrier, BCO and shipper customers. It also improves visibility and transparency across global supply chains.

Capabilities to Transform Your Operations

Access New Business

Win business in loadboards and other digital marketplaces by leveraging Blume machine learning to automate bidding on loads with dynamic pricing. Expand your business by digitizing your work order management and participate in a spot market within your network and the broader Blume network.

Digitally Manage Rates & Contracts

Leverage a centralized repository that stores all of your standard and contracted rates. Collaborate with customers on contract terms including rates and routes. Automatically assign a customer work order to a contracted rate or dynamically adjust your rates based on the latest market conditions. Amend your charges by tying logistic events to a line item in your invoice.

Driver Management

Run your business smoother by digitally managing your drivers, so you can automatically or auto-assist assign work orders to individual drivers on your team.

Track Execution & Provide Visibility

View your loads on the CarrierGo™ dashboard. Configure your milestone notifications based on your unique business needs and receive automated notifications. Enable exception resolution before it's too late.

Automate Invoicing & Expedite Time to Payment

Automatically generate invoices triggered by driver proof of delivery. Pre-approve unanticipated accessorial fees and fuel surcharges to reduce or eliminate freight audit time enabling faster approval of invoices and lower risk of payment delays.

Automate Manual Operations

Eliminate the reliance on paper and other manual processes to accept or reject, execute moves and invoice customers. Blume CarrierGo™ can provide motor carriers access to new business opportunities and optimize driver utilization and collecting payments with minimal disputes.
